FEBRUARY 2008

WALLEYE LINES

Promoting conservation, sportsmanship and education in respect to walleye fishing.

Thursday, February 21st Doublewood Inn, Fargo ND

- Chili Feed
- ***** Annual Meeting *****

NICK JOHNSON

Nick Johnson, who has been called "the hottest walleye angler in the world" will be the guest speaker at this year's FM-Walleyes Unlimited Annual Meeting. Nick has received this recognition from winning the 2004 FLW Championship, 2005 FLW Bull Shoals event and the 2005 FLW Angler of the year.

Nick grew-up fishing the diverse Pool 4 of the Mississippi River. Here he gained his knowledge and experience to be

the diverse angler that he is. Over the years Nick has become proficient with plastics and will share those tactics, tips, and tweeks that he has perfected.

Thursday, February 21st at the Doublewood Inn, Fargo
The Chili Feed starts at 6:00 PM. Annual Meeting starts at
7:00 PM followed by the Nick Johnson Seminar.
A current membership is required to attend the meeting.
New memberships and renewals are available at the door.

CALENDAR OF EVENTS

ALL MEETINGS AT 7 PM AT THE DOUBLEWOOD INN OF FARGO, UNLESS OTHERWISE STATED.

President's Comments...

Dear Club Members,

Our annual meeting is fast approaching. Make sure you attend to enjoy the free chili feed and a seminar by FLW Pro Nick Johnson. We owe Nick Johnson a Big Thank You for filling in as our speaker on short notice as our previously scheduled speaker encountered a scheduling conflict. Please bring a potential new member to the meeting. Remember that everyone in attendance must pay their dues at or prior to the event.

Our last few meetings have been nothing short of phenomenal. Last month over 180 people were in attendance to listen to Ron Seelhoff speak. We owe a big thank you to Tom Backer and Dave Randash who helped Ron out with his presentation as Ron was suffering from a sore throat and could not speak very well. The trio made for a fun evening in which many questions were asked and answered. Ron was throwing out new Rapala lures to those that asked questions.

Congratulations to everyone involved with putting on the Walleye University classes. It is a great program and was on the news last month courtesy of Steve Hallstrom, WDAY Channel 6.

Best Fishes,

Chad Maloy, President

FM Walleyes Unlimited, Inc. 2008 Club Outing Schedule Announced

April 26th & 27th Waubay Lake - Webster, SD

Time: 7:30 - 3:00 (both days)
Weigh-in: Breske Bay Landing
Lodging: Holiday Motel

Annual Dinner Dance

by Tami Stillwell

This year's dinner dance was held on Saturday, January 19th, at the El Zagal Shrine in Fargo, ND. We had a excellent turn out. Lots of raffle prizes provided an opportunity for everyone to see just how lucky they really were. We had a great meal that was catered by One-on-One Catering. The MoJo Boogie Band again was superb and gave us all a chance to dance the night away.

I want to thank the members that helped me make this year's event a success: Steve & Emily Garten, Steve & Mary Hall, Chad Maloy, Barry & Karen Chouinard, Steve & Mary Beth Meyer, Colette Haskins, Guy Kimball, Glenn Metzger, Pete & Helen Montplaisir, Ron Sahr, Dave Schmidt, Rendy Randash, Scott Stillwell, Grady Stillwell, Blake & Brittany Meyer.

Please make note of the following donors that made our event even more enjoyable with their generosity. Remember that it's always great to do business with those who donate to our club & events.

Advanced Garage Door • Anytime Fitness • Bella Properties

Bob's Drywall • Bottle Barn, Moorhead • Carpet World • CashWise Liquors •
Cass County Heating • Central Door & Hardware • Crystal Pierz Marine

BOARD MEETING MINUTES-TUESDAY, JANUARY 15, 2008 @ THE DOUBLEWOOD INN

Meeting was called to order @ 7.00pm by President Chad Maloy.

All Board Members in attendance. Guests present: Scott Stillwell & Brian Dahlin.

Treasurer's Report by Barry Chouinard: Current balance is \$5,702.26.

Membership Report by Don Marty: 241 members

OLD BUSINESS:

- -Review of last month's board meeting minutes. Motion made to approve minutes by Steve Meyer, second by Chris Augustin. All in favor, motion passed.
- -Youth Education, Stillwells. FM Walleyes University program will be held on before our January 17th general membership meeting. The first class will be open to club members children and/or grandchildren. The class will be limited to the first 24 children. The class will start @ 6pm in the Chestnut Room @ the Doublewood Inn..
- -Dinner/Dance, Tami Stillwell. Everything is on track and the event is scheduled to take place on Saturday, January 19th, 2008 @ El Zagal Shrine. The MoJo Boogie Band will provide the music again this year. Contact Tami @ 701 367 6741 if you are willing to help.
- -Sponsorship/Ad, Barry Chouinard. Auggie provided an update on sponsors that he has locked in.
- -Angler, Young Angler Tournament. This tournament is limited to 40 teams. Lake Region Anglers club of Devils Lake ND has now made a firm commitment to the event. Permit has been applied for to hold tourney @ Devils Lake, Lakewood Ramp on Saturday, July 12th. Volunteers will be needed. We will have help from the Lund Pro Staff from the area also. Working on getting video coverage of the event.
- -Tournament Update, Barry Chouinard. Currently working on new entrance application, one application for both major events. Rules will be posted on the web, instead of listed on the application. Work is being done on the website for easier usage.
- -YMCA Indoor Ice Fishing Contest, Ron Sahr. This event was changed from outside event @ Big Cormorant Y-Camp to the Fargo Main YMCA. To be held from 1-3pm on Saturday, January 26th. Kids will be taught casting.
- -Meetings Update: Feb 21st: Nick Johnson Mar 20th: Ted Takasaki, Anglers Night April 17th: Denny Palmer May 15th: Corey Heiser
- -Nomination Committee. Don Marty, Steve Meyer & Steve Garten. Expiring terms need to be filled. Possibilities were discussed.
- -Club Outings, Steve Hall. Next year's outing dates are being firmed up & will be announced soon.
- -Distinguished Member Committee. Ron Sahr, Bob Jensen, Mike Miller, Barry Chouinard & Steve Meyer. Currently accepting nominations & reviewing these. This award will be presented at the March meeting.

NO NEW BUSINESS:

-Motion to adjourn meeting by Steve Hall, second by Auggie. All in favor, the meeting was adjourned at 8.20pm.

The next board meeting with be on Tuesday, February 19th, 2008 at the Doublewood Inn. Please remember that the general membership is always welcome to attend any or all board meetings.

Respectfully submitted by Tami Stillwell, Recording Secretary.

MEMBERS CAUGHT! by Steve Garten

This month I am very pleased to introduce Jack Fuller, I know a lot of our members know Jack and of his work for our Club. But for those of you (like me), here is our chance to know him better.

Jack and his wife Jan live in West Fargo. He retired six years ago after thirty-six years as a School Administrator. His last position was that of a Elementary Principal at Central Cass in Casselton for twenty-two years. Jan is a Beautician, working at Waterford. They fish alot, have a camper on Devils Lake, spending about four days a week there, during the summer. Jack loves working with electronics and what can be accomplished with them.

Many of you will remember his past articles in the Walleye Lines, "Fishing Personalities. As I stated in my first *Members Caught* article, this is where my idea came from. In fact, I had never met Jack, but always had seen him at our monthly meetings. At our

November meeting, I wanted to introduce myself to him and ask if he would like to be featured in *Members Caught*. Needless to say, I was slightly embarrassed when I learned who he was. Please join me in welcoming Jack!

The people who influenced my fishing the most?

"I believe the person that influenced and inspired my fishing the most is Mike Miller. Back when Mike was doing his first radio shows with KFGO, I was hunting in the late fall and heard someone talking ice fishing. I said to my hunting partner, "pull over, somebody is talking ice fishing". We had been doing some ice fishing in those years so it peaked my interest. The next week I listened for the show and sure enough, Mike was on again. I enjoyed his tips and style so much I called the station to see if I could talk with this "fishin guy". They said he had just left but they would give him my name. They did, but I forgot to leave my phone number and I thought an important radio personality would not get back to me anyway. That night Mike called me at home. I asked how he had found me (I lived in Arthur, N.D. at the time)? He said he went though all the small town phone books until he came up with my number. We talked fishing for a long time that night. Since then I have attended all the fishing seminars and slide shows he put on and have fished with Mike. I call Mike "therapeutic". When I was in the hospital for various surgeries or sick, all I needed was to listen to his show and it would pick me right up."

Favorite walleye fishing tactic?

"The fall fishing on Devils Lake was great this year, but you had to get right over them with a jig and hold extremely still. Even using the hook through the mouth, out the gill, and up through the back of the minnow technique they would still would often steal the bait. Therefore, I used the same baiting technique but added a small baggy tie, which I secured around the minnow and hook near the bend in the hook. That did the job! They were not able to suck the minnow off the hook with it tied on that way. It did not affect the bite at all. In fact, I caught four Walleyes on one minnow. The fifth left only the baggy tie on the hook. The minnow was getting pretty ragged by then."

Funniest fishing experience?

"The funniest was when my neighbor Pete, brother-in-law Mic, and I were ice fishing Crappie on Prairie Lake. The action got hot and everyone was hurrying putting on minnows getting back down the hole etc. During the excitement, Mic was hollering "where's the minnow scoop, where's the minnow scoop"? I said it's right in your hand with a full load of minnows in it. In the rush, he had scooped up a load of minnows from the bucket and was watching us pull up Crappie and forgot about what he was doing."

Best fishing experience?

"Helping Tom Stoe land his 11 ½ lb. Walleye. As the net man, if I had missed that fish I would have jumped in after it. It was not going to get away on "my watch". Every day on the water with my wife and/or friends is a great experience!"

Thanks Jack! Appreciate your contributions to FM Walleyes. So who will be CAUGHT next!

Ron Seelhoff Recap

by Chris Augustin

Despite fighting off a horrendous cold and a weak voice, Ron Seelhoff gave an excellent seminar, with a little help from Tom Backer and Dave Randash. Ron has become well known for his ability to troll walleyes using leadcore.

Leadcore is a type of fishing line that has a thin filament of lead that weighs lures down and enables an angler to make a shallow diving crank bait run deeper. Lead core is very speed dependent because of it weight. The faster you troll the more line you need out to reach a desired depth. According Backer at about 2.2mph lures run an addition five feet deeper for every color (30ft) you let out. This is a common speed for many seasoned leadcore users. However, Ron trolls against the norm and commonly trolls much faster (2.5-3.2mph). Even when the water has just iced-out or is near freeze-up, Ron he still trolls at these high speeds.

When trolling at these speeds Ron said it's very important to tune and retune lures throughout the day. Tuning a lure is done by dragging the crankbait next to the boat and checking that it trolls straight. If the lure doesn't follow straight you bend the eyelet the opposite direction to which the crankbait moves.

According to Ron walleyes aren't as smart as what most people think. He is a firm believer in natural colored crankbaits such as perch and black/silver shad raps. He does go through many various colors throughout the day, but continues to catch most of his fish on the natural colors.

Ron likes to keep his rod and reel setup simple. He uses large reels, such as Diawa 47 that can hold 10 colors of lead. He then ties a 6-12ft leader from the lead to the crankbait. This improves rod action and improves fighting fish. Usually the leader is 10lb monofilament, but when the area is full of snags or pike he switches to 10-14lb fireline. When trolling with four rods Ron uses long rods (10-12ft) on the side of the boat that are positioned parallel to the water. Fighting fish can be tricky with long rods and fighting fish from the bow makes landing a fish easier. His rear rods are much shorter (5-6ft) and are placed in the rod holder at a 45 degree angle.

A few things that Ron reiterated through out the seminar were to keep things the same and simple, it makes reproducing depths easier. Ron is very adamant about maintaining the same boat speed for depth consistency. Instead of switching speeds, Ron will pump rods by hand to produce bites. These tips that simplify a complicated presentation were impressive to see and hear from such an accomplished angler.

First Class of the FM Walleyes University

by Scott Stillwell

On January 17th the inaugural class of the FM Walleyes University was held for an hour before the January regular meeting. We had 28 students between the ages of 5-13 who attended the class. They were taught knot tying; hook baiting; casting; rig, jig & bobber fishing; netting & fish handling. Our volunteers were able to enthuse and excite the kids at all of these stations and everyone involved (students and instructors) had a blast.

After the kids were sent to the multiple stations, the parents attended a separate meeting where we talked about the ultimate goal of fishing, which is having fun!!!

It doesn't matter how many fish we catch or don't catch while fishing. What's really important is parents and children spending quality time together sharing an activity which is not only multi-generational but can also enhance the parent/child relationship.

After the students completed all the stations, they were awarded diplomas and given some gifts sponsored by Lund Boats and a tackle kit from FM Walleyes.

A youth education program like this could not happen without the assistance of many talented club members acting as instructors and leaders. On that note I would like to thank Rendy Randash, Helen Montplaisir, Scott Brewer, Glenn Metzger, Kyle Agre, Scott Dodgson, Dave Randash, Brian Dahlin, Ron Sahr, Steve Meyer, Tami and Grady Stillwell.

The best way to promote the sport of fishing is to educate the young and hook them early with the hopes that they develop a passion for fishing which will help them to develop a healthy habit that they can enjoy for a lifetime.

Please stay tuned to the Walleye Lines for information on upcoming classes.

YMCA Ice Derby

By Ron Sahr

Bad ice conditions forced the YMCA to move the fishing derby inside at the Downtown Fargo YMCA. Parents, grandparents and kids had an afternoon filled with several activities.

The kids enjoyed a casting class taught by FM Walleyes. Many of these kids had never been taught the art of casting. Several adults also tried their skills at hitting the casting targets. It is rewarding to see how fast these kids learn. Many kids came back several times.

I'd like to thanks the following individuals for making this event a huge success. Steve Goldade, Tim Weik, Ron Sahr, Pat Sorinson, Tom McGeehan, Bruce Bokinski, Lynn Johnson and Bob Jensen.

WALLEYE LINES FEBRUARY 2008

How High? Real High

By Jason Mitchell

The lesson was learned by accident... the result of trial and error. Several years ago, a friend and I were fishing for crappie on Jamestown Reservoir located in south central North Dakota. In typical crappie fashion, most of the fish were suspended about four feet off the bottom in twelve feet of water all morning long. As the sun crept higher and the morning progressed, the fish seemed to rise. By midday, the top half of the water column came alive on the Vexilar with flashes of red and yellow indicating suspended fish. The fish were eating anything that dropped in front of them. Over the course of the day, the intensity dropped and the action slowed. After trying to unsuccessfully get back on the pod of fish by drilling more holes, we dropped back down the original holes that had been so hot just hours before.

On a whim, I tried fishing really high, higher than the Vexilar could read just inches below the ice. I had a fish on immediately. When I set the hook, I thought I had snagged the bottom of the hole. Up came a nice crappie and than another crappie. We were into the fish again and the fish were literally inches below our boots right under the ice. Pretty cool I thought. Perhaps the zooplankton had collected right below the ice as the sun increased in intensity or maybe something else happened relating to the food chain that brought these fish continually higher through out the day. These fish kept raising until the fish were to the point of banging their heads on the bottom of the ice.

We have been able to stumble onto this pattern with both sunfish and crappie. The fish keep rising following clouds of scuds, backswimmers and other micro morsels until they seemingly disappear. Disappearing in the sense that electronics aren't as effective. Even sight fishing can be difficult because if the fish are running right below the ice, using this massive plane as an edge to corner and corral prey, we can only see an area the size of the hole we drilled.

There are other more dangerous situations however where this pattern can emerge. Low oxygen levels, deep snow, dying vegetation and the other biological factors that combine to form winter fish kills. Obviously, life threatening oxygen depletion is very stressful for a fish. When fish become too stressed, they quit eating, game over. Until they hit this threshold however, these stressed fish can be caught and usually, every fish in the lake is just inches under the ice with their lips practically licking the bottom of the ice because this is usually where the last blanket of oxygen rich water can be found. This particular pattern is a situation that I wouldn't wish upon any of your favorite panfish lakes but with this potential travesty does come some window of opportunity.

Other situations where the six inches right below the ice is worth fishing can sometimes occur in thick weed beds that are basically unfishable. I just got off the phone with one of our Pro Staff anglers and Ice Team Power Stick, Jim Hudson from Bayfield Wisconsin. Jim is phenomenal ice angler who just works hard at fishing and has a good understanding of how to crack patterns. Jim is also a successful guide in Northern Wisconsin. Hudson went on to describe a lake he had just fished in central Minnesota for blue gill. They ended up finding many of their fish right up along the shoreline in the midst of the thickest and densest canopies of cabbage that they could find. The areas they drilled were the spots on the ice where they could see several weed fragments froze into the ice. The only way they could even fish this jungle was by using the auger flighting to actually ream out an area below the ice, chopping up weeds and making a small window to snake an ice jig down. That is where the fish were, right below the ice in weeds that were virtually too thick to fish. Perhaps fish end up in locations like this because of larger predators like pike or bass. Maybe fishing pressure is factor in the sense that fish that spend most of their time in these types of locations live long enough to grow. The big blue gill that prefers the outside edge of the weed bed located on a textbook break line has already been caught by now on many lakes.

Day in and day out, the window of the water column that meets the ice is not the first place we look for fish. But every now and then, this edge where ice meets water has to be looked at as we eliminate water and attempt to hunt for panfish. Most anglers will fish the whole water column yet skip the zone right below the ice. There are cases now and than where that may be a mistake.

LOWRANGE SCHOOL

Presented by National Walleye Champion Bruce Samson, M.D.

If you own a recent Lowrance LMS, LCX or comparable Eagle model and want more than basics, this school is for you!

Time: 9:15 AM-4:15 PM Saturday March 15, 2008. Lunch is included

Location: Scheels-Fargo, ND

Registration: The cost for the Lowrance School is \$100.

Please pre-register. Class size is limited. For future Schools go to www.hightechfishing.com

Email doc@hightechfishing.com or call 952-240-9298 for more information
